

ECLIPSE WORKS HARD SO YOU DON'T HAVE TO

Eclipse constantly works behind the scenes to reduce your workload. Our unmatched conflict resolution elevates AI to new heights, leveraging advanced contextual analysis to interpret the true meaning of words within the entire transcript. Portable Proofreading lets you proofread your work anytime, anywhere, on any device. Our ever-evolving Transcript Management Suite simplifies transcript production from beginning to delivery. And new features too numerous to list help keep reporting interesting and fun.

HIT THE GROUND RUNNING WITH A BOOST BOX™

Eliminate delays and enhance security with our inexpensive Boost Box. Use Boost minutes locally, without relying on the internet. Enjoy uninterrupted productivity while maintaining peace of mind.

WE'RE ALWAYS HERE WHEN YOU NEED US

Our unrivaled Anytime Support™ grants you fast access to our friendly technicians every hour of every day, ensuring prompt assistance whenever you need it.

 Eclipse 11

BREAK THROUGH

ADVANTAGE
SOFTWARE

Eclipse 11 sets new standards for modern court reporting software with a fresh design and breakthrough features.

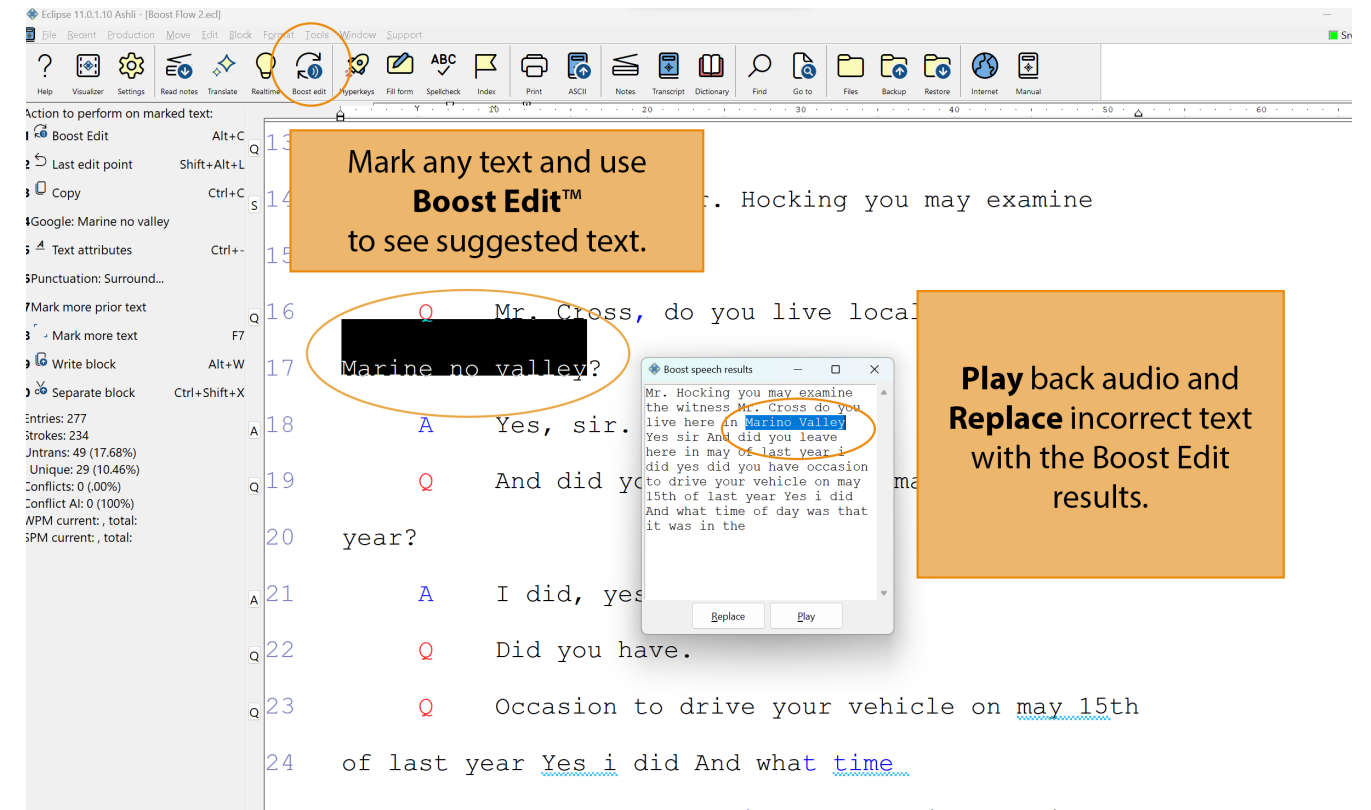

Unlock your full potential with our exclusive Boost™ feature, now boasting enhanced speeds, realtime support, and advanced editing capabilities. Boost enables intelligent comparison between steno translations and ASR output, significantly improving accuracy. With the introduction of Boost Flow™, you have full control over artificial intelligence, enabling you to customize the usage of ASR text according to your specific needs.

BOOST YOUR CONFIDENCE

Never hesitate to display realtime again. With Boost Flow™, you'll witness unparalleled accuracy as dropped strokes become a thing of the past. Intelligent comparisons of your steno translations with results from a robust speech engine produce ultra-clean realtime output. Take control and showcase your skills like never before!

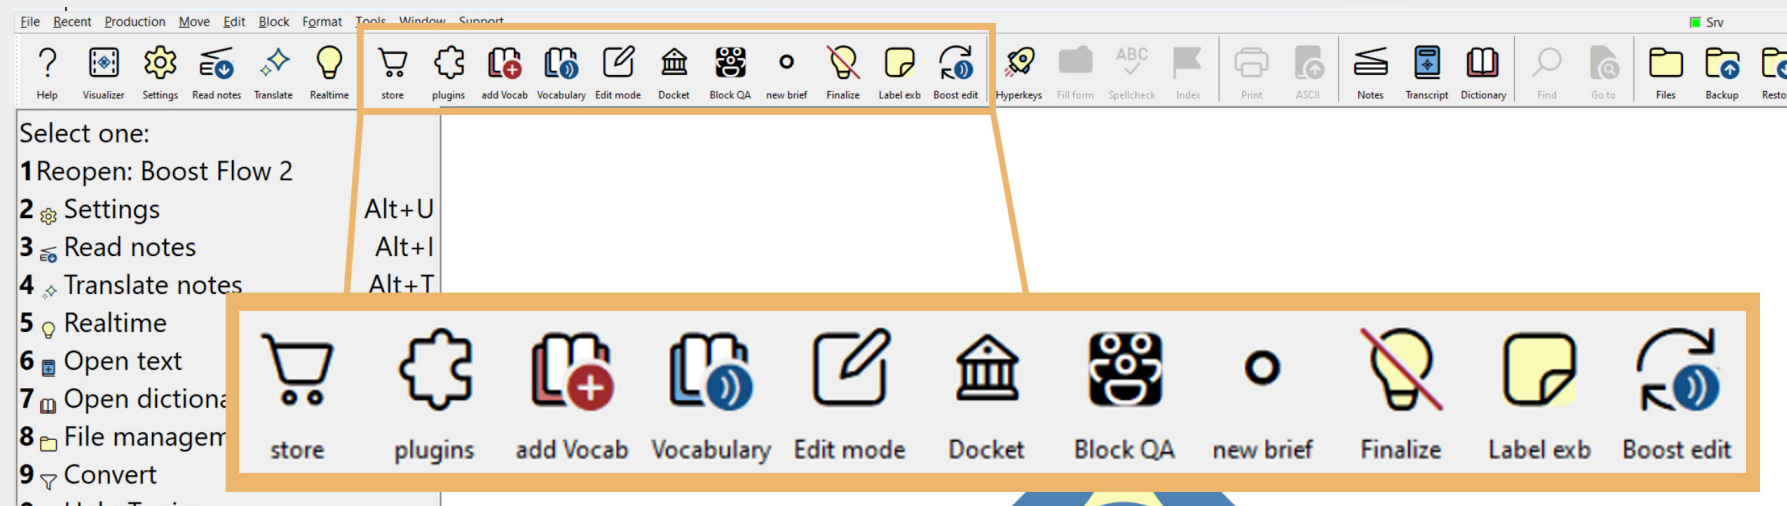

BOOST YOUR THROUGHPUT

Use Boost Edit Mode to edit as fast as you can write. Edit transcripts entirely from the writer with a powerful single-stroke macro system for lightning-fast corrections. Experience a seamless integration of speech engine words into your translation, exactly like steno. Easily create, modify, and delete speech-based entries as if they were steno. This realtime hybrid of steno input and speech recognition yields superior results unmatched by other technology.

PLUGIN SYSTEM FOR RAPID DEPLOYMENT

Advantage Software's relentless R&D efforts continue to accelerate. Our new plugin system empowers rapid development, enabling the creation of new functions without compromising core functionality. Stay ahead of the curve with endless possibilities for customization.

EFFORTLESS REALTIME CONNECTIONS

Fully-integrated Connectify Hotspot software and Bridge Mobile trial-viewing software make connecting with clients locally or worldwide a breeze.
